

Market Studies Available from IHS Emerging Energy Research

IHS EER offers in-depth market studies analyzing clean and renewable energy markets. IHS EER studies are primary research-based, and provide clients with a rich resource of market intelligence, market forecasts, competitive analysis, and strategy review.

Studies typically provide the following: technology trends, detailed regulatory analysis by country, profiles of key market players, and analyses of strategies of developers and technology providers. IHS EER studies provide a thorough balance sheet of emerging energy activities and dynamic industry analysis designed to guide future competitive investments.

IHS EER's market studies are essential resources for those competing - or looking to compete - in emerging energy markets, including utilities, IPPs, developers, technology companies, component suppliers, and equipment manufacturers.

See below for a list of recent IHS EER market studies. For more information, contact eersales@ihs.com or visit our website at www.emerging-energy.com.
